Developer with experience creating and customizing ERP modules in Odoo using Python and PostgreSQL. Skilled in building robust backend solutions, automating processes, working under agile methodologies, and communicating directly with key users. Looking to apply my skills to design and implement efficient solutions that add value to the business.

PROFESSIONAL EXPERIENCE

AINCRAD — Odoo Developer (external consultant at ON Empresas)

Sep 2025 - Present

- Developed a change-ticket management module for the ITSM system in Odoo 18, with real-time validations via REST API against another system before approving each change.
- Implemented the onboarding process into an Odoo 19 portal, including data cleansing and migration from an external PostgreSQL database.
- Built an IT asset auditing module (cloud and on-premise) used internally across the organization.
- Integrated the platform with network monitoring systems (Observium) and circuit state management (OSS).

Gald Perfecto — Freelance Developer

Jan 2025 - May 2025

- Developed a web app and a mobile app for a water sanitation company.
- Web frontend in React.js connected to a Spring Boot backend; cross-platform mobile app with React Native.

IT TALENT S.A.C. — Freelance ERP Support

Sep 2024 - Apr 2025

- Support and customization of Odoo 18 Enterprise: Website, CRM, Marketing, and Assessment modules adapted to client needs.

Primero Soluciones — Odoo Developer

Apr 2023 - Jul 2024

- Developed and customized Odoo modules with Python and the ORM, adapting the ERP to service-sector processes.
- Designed QWeb reports and automated administrative workflows using Python scripts and Automated Actions.
- Optimized PostgreSQL performance and integrated REST APIs with third-party systems.

TECHNICAL SKILLS

Specialty: Odoo (14 - 19): custom modules, ORM, QWeb, OWL, Portal.

Backend: Python, FastAPI, Spring Boot, Node.js, REST/XML-RPC APIs.

Databases: PostgreSQL, MySQL, SQLite.

Frontend: React, React Native, TypeScript, JavaScript, Tailwind CSS, HTML, CSS.

Processes: BPMN 2.0, Scrum, Kanban.

Tools: Git, GitHub, Docker, Linux, AI-assisted development.

EDUCATION

Universidad San Ignacio de Loyola (USIL) — Lima, Peru

Final year (in progress)

B.S. in Business and Systems Engineering
